

12v 100ah lithium leisure battery

12v 100ah lithium leisure battery

The leisure battery is the heart of the campervan electrical system. Get the perfect leisure battery for your adventures, alongside battery monitoring, busbars, switches, wires, fuses and more. Install with confidence using this all-in-one package for your electrical system. Step-by-step installation guide included.

Everybody's campervan conversion is different. There's no reason your electrical system shouldn't be too.

Build your own Victron powered campervan electrical system in minutes;

The battery is the heart of your campervan's electrical system. Buy your 100ah LiFePO4 Leisure Battery with the associated busbars, wires, switches and fuses so you can install your battery with one straightforward purchase.

Choose one of the best-value for money Lithium Phosphate batteries on the market.

Many systems on the market recommend connecting your campervan electrical system directly to your batteries. The problem with this is that things can get messy quickly if you have many connections going to one small terminal on the battery. We recommend using the Victron Energy Lynx Distributor or the Combi Fuse Holder to fix this.

The Victron Energy Lynx Distributor is perfect for most systems larger than 200A. In real terms, this means that if you plan to install a Victron Inverter/Multiplus larger than 1200VA then this is the option for you. If you are installing an electrical system which uses up to 1200W 230V while off-grid then we recommend using our smaller Combi fuse battery system. When you select the Victron Energy Lynx Distributor, the following is added to your order:

The Combi Fuse Holder streamlines your campervan electrics. The combi Fuse Holder is a Busbar with Fuses Holders built in. This means less wiring for you and reduces the number of connections in your electrical system, improving its reliability. When you choose Combi Fuse Holder, the following is added to your order:

Knowing how much energy is left in your campervan leisure battery is vital to ensure your adventures aren't needlessly cut short. Always know how much power you have by including battery monitoring in the form of a Victron Energy SmartShunt 500A/50mV; use Bluetooth on your phone using the Victron Energy app to monitor your battery health at all times.

Monitor your battery's health at all times via Bluetooth using the Victron Energy SmartShunt. What's included when you select this option:

12v 100ah lithium leisure battery

If you want to maximise and monitor your whole campervan electrical system, then the Victron Energy Cerbo GX is what you want. The Cerbo GX lets you remotely (via WiFi) monitor your Battery, Inverter, Multiplus and solar panels to maximise the performance of your campervan electrical system.

Monitor your battery, inverter, multplus and solar panels health at all times via Bluetooth or remotely on WiFi. What's included when you select this option:
