

200 kWh home energy storage battery pack

200 kWh home energy storage battery pack

EGbatt Innovative High-Voltage ESS Battery Solutions 800V 200KWH high voltage lithium battery is a flexible, modular and extensible battery energy system solution. The design of EGbatt 200kwh battery outdoor integrated cabinet energy storage system has independent self-power supply system, temperature control system, fire detection system, fire protection system, emergency system and other automatic control and security systems to meet various outdoor application scenarios.

Solutions Maximize your business's capabilities with our advanced high-voltage battery systems, delivering the utmost in efficient and dependable energy storage choices available. Crafted with state-of-the-art LiFePO4 (LFP) technology, our 600v 200KWH batteries are meticulously tailored to fulfill the demands of commercial and industrial applications.

Seize the Chance to Transform Your Business with Our Cutting-Edge High-Voltage ESS Battery Systems. By embracing our state-of-the-art energy storage solutions, you can effectively manage energy expenses and contribute to a more sustainable future for your enterprise.

Reach out to us now for further insights into our high-voltage ESS battery product range, and uncover the ideal energy storage answer for your commercial or industrial needs.

Robust Protection for Varied Environments: Equipped with IP55 protection and featuring a constant temperature function powered by air conditioning, this battery system is well-suited for regions prone to typhoons and coastal conditions.

Efficient and Lightweight Design: Engineered with a hardware architecture that emphasizes high efficiency, exceptional power density, and a lightweight profile, ensuring optimal performance without compromising on weight.

Enhanced Safety and Longevity: Utilizes a lithium iron phosphate battery pack renowned for its superior safety profile and extended lifespan, offering peace of mind in terms of both usage and durability.

Embedded BMS Management System: The built-in Battery Management System (BMS) serves as a vigilant overseer, effectively monitoring and managing both the battery modules and the entire system. This robust oversight guarantees secure and reliable operation.

Remote Intelligent Monitoring: Enabling remote, intelligent monitoring, this feature covers the entire lifecycle of the product and service. From initial installation and deployment to ongoing system operation, intelligent maintenance, statistical analysis, and even fault repair, this holistic approach ensures comprehensive oversight

and support.

Our cutting-edge battery systems empower you to efficiently oversee your energy usage, leading to cost savings and heightened sustainability.

Featuring three capacity choices, our high-voltage ESS battery systems are readily adaptable to accommodate your business's evolving requirements.

Fortify your operations against power failures and interruptions with our trustworthy energy storage remedies.
