

20kw residential solar system

20kw residential solar system

Everything you need to grow your business with solar

Achieve energy independence with our 20kW solar systems. Generating approximately 2,000 to 3,000 kWh of AC power a month, 20kW solar systems are ideal for large households with several EVs and huge energy demands.

Choose from a selection of grid-tie and off-grid 20kW solar systems, or get in touch with our experts for a custom system!

GoGreenSolar is the only solar company giving you a money-back guarantee. In case your permit isn't approved despite adhering to the correct procedures, we will fully reimburse your money.

*Exclusions apply, see Terms and Conditions.

Our premium solar panels are backed by top-notch technical assistance from our team of solar specialists.

IronRidge builds the strongest roof and ground mounting systems in solar. Every component has been tested to the limit and proven in extreme environments.

A microinverter or string inverter to convert solar panel DC power to AC power and provide net metering capability.

Monitoring apps oversee your solar production, helping you catch issues early to ensure efficient system performance and cost savings.

Our state-of-the-art batteries enable you to store surplus energy generated during the day, utilizing it during nighttime or peak demand periods to maximize your energy savings.

We can create a custom solar electrical design for your home that's compliant with local codes and regulations. We'll work closely with your city, HOA and utility to get your system up and running.

Variables like weather, temperature, system age, and panel cleanliness can affect how much power your solar system can produce. At its highest output, a 20kW solar panel system produces about 80 kWh per day. Considering possible system losses caused by these factors, you might experience an efficiency reduction of approximately 5% under certain conditions.
