

24v lithium ion battery

24v lithium ion battery

Exceptional lifespan with more than 2000 cycles (80% DOD), 4 times of lead-acid battery

A space-saving choice for your 24V power system, Upgrades from lead-acid to lithium seamlessly with a greater energy density, 100% usable capacity, and a faster-charging speed.

Automatically switch to energy-saving mode in 30s, The self-discharge rate is as low as 3% per month, Offers good performance on storage and endurance.

The state-of-the-art battery management system (BMS) provides short circuits, overcharging, and over-temperature protection while maintaining a balanced voltage across all cells, Ensures reliable power output and a longer lifespan.

Up to 8 batteries can be easily connected in parallel, Auto-balancing function, improve the average charging efficiency of your batteries over extended use.

Reliable output and ultra safety, Performance certified with MSDS, UN38.3, FCC, CE, UKCA, and PSE, IP65 waterproof, protected against water and dust with the fully sealed housing.

If the battery's Battery Management System (BMS) is activated and the battery voltage shows 0V, you must use a compatible Li charger to reactivate this battery.

Make sure to screw in the battery terminals tightly, Loose battery terminals will cause heat build-up and cause damage to the battery.

DO NOT string these batteries in series, They are made ONLY for wiring in parallel using identical batteries.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

“Bottom line up front: This battery is pretty awesome on it's own; it's amazing for the price rst, LiTime's packaging is on point....” Read more

“...without a lithium specific charger, but this battery can handle charging up to 99% using the stock charger built in my RV....” Read more
