

## 2kw solar system off grid

2kw solar system off grid

2KW off grid solar system (off-the-grid, standalone) is the obvious alternative to one that is grid-tied. For homeowners that have access to the grid, off-grid solar systems are usually out of question. Here`s why: To ensure access to electricity at all times, off-grid solar systems require battery storage and a backup generator (if you live off-the-grid). On top of this, a battery bank typically needs to be replaced after 15 years. Batteries are complicated, expensive and decrease overall system efficiency. Off grid solar kit is a great option to supply electricity for home use, especially in remote areas and in places where grid electricity is difficult to obtain.

2KW Off Grid Solar System is a great option for people with average power use, living in small homes. They are particularly suited to small families or houses.

Off-grid means you off (switch off) the power grid or the local utility company that sends you an electricity bill every month. However, off grid solar systems are gonna give you the freedom to live where you want, remotely, away from the power grid so you can be your own power generator.

There are several components in an off grid system as we told you before. Solar panels capture the sun`s energy and convert it to DC power, which is then gonna be wired down to your solar charge controller, which is wired to your solar battery. It regulates that voltage into your solar battery to store the energy. From this stored energy, we`re able to utilize our solar inverter which is gonna turn that energy into AC power, which will power all your common household appliances.

UTL is one of India`s leading solar companies that specializes in providing the best solar products including complete "Off Grid Solar System". UTL off grid solar system combines the capabilities of photovoltaic panels and solar batteries to remove the electrical grid component entirely from your system. UTL off grid system is nothing but just a composition of several solar components including solar panels, solar inverter and solar battery.

## 2kw solar system off grid

Investment in UTL's off grid solar definitely leads you to great savings, while protecting the environment. Our performance and manufacturing excellence is powered by some of the world's most advanced technologies. UTL solar systems can easily be executed on rooftops or even at grounds.

Enjoy all the comforts of being solar with our 1kW off-grid solar power system that includes 3 Nos of 330 watt solar panels of superior quality. UTL 1kW off grid system is energy efficient, low cost solar system with high efficiency and zero emission. Our 1kW solar system is the smallest capacity stand-alone system that can operate independently without utility power. It is definitely the best alternative to power small sized houses, having two or three rooms.
