400 watt solar panels cost

Fast, FREE Delivery is available to Prime members. To join, select "Try Amazon Prime and start saving today with Fast, FREE Delivery" below the Add to Cart button.

Important: Your credit card will NOT be charged when you start your free trial or if you cancel during the trial period. If you're happy with Amazon Prime, do nothing. At the end of the free trial, your membership will automatically upgrade to a monthly membership.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

"...UPDATE:I am now at May 27;24 and the system still runs like a champ. I did upgrade my battery to a 2800wh LiFOe...." Read more

"...The kit was pretty much as expected. It does the job and works well. I have a few things to criticize:..." Read more

"First I want to make it clear that the panels and charge controller work fine..." Read more

"...is nice but as you'll see if you use only that it is totally unreliable for a battery monitor...." Read more

"... was not super hard to setup. Make sure you get a battery shunt to better monitor your battery. That was why I ended up draining down to 77amps...." Read more

"Easy for a Novice to put together" Read more

"...The instructions for the MPPT Rover are good but the instructions on the solar panels themselves in non-existent...." Read more

"...The system works well, was easy to configure and doesn't need any intervention during operation...." Read more

"... comes with everything you need (the panels get hooked up in series (+--+--+)) and the cables are all sized accordingly...." Read more
