The Sunny Tripower CORE1 is the world's first free-standing string inverter for decentralized rooftop and ground-based PV systems as well as covered parking spaces. The groundbreaking new design allows reductions in installation time of up to 60% and, at the same time, lowers the total cost of ownership (OPEX).

Now with Arc-fault circuit interrupter and I-V curve diagnoses

Its unique, free-standing design allows the Sunny Tripower CORE1 to be installed 60% faster than other string inverters. The innovative, fully integrated design of the CORE1 ensures low BoS costs, simpler project processes and lower material expenses. It sets new standards for decentralized rooftop and ground-based PV systems and covered parking lots.

The CORE1 has proven its value. Thanks to its versatility, it has become the first choice for commercial PV projects, enjoys great popularity and has unlimited delivery capacity.

From delivery and installation to operation, the Sunny Tripower CORE1 generates widespread savings in logistics, labor, materials and services. With integrated Wi-Fi access for fast commissioning, up-to-date plug-and-play communication and smart grid support functions, PV installations are quicker and easier to complete than ever before.
