Lithium carbonate is a key chemical in the production chain, serving as a versatile product; the basis for other lithium derivatives like lithium hydroxide. Integral to battery materials technologies.

Albemarle Corporation is an American specialty chemicals manufacturing company based in Charlotte, North Carolina. It operates 3 divisions: lithium (68.4% of 2022 revenues), bromine specialties (19.3% of 2022 revenues) and catalysts (12.3% of 2022 revenues).[2]

As of 2020[update], Albemarle was the largest provider of lithium for electric vehicle batteries in the world.[3] Albemarle, Sociedad Qu?mica y Minera, and FMC Corporation collectively produce just over half of the world's lithium and lithium storage products, while just under half is produced by China.[citation needed]

The company is ranked 780th on the Fortune 1000 based on fiscal 2021 revenues.[5]

In February 1994, Ethyl Corporation completed the corporate spin-off of its chemical businesses to form Albemarle Corporation.[6] Albemarle was headquartered in Richmond, Virginia, until 2008 when it announced plans to move its corporate headquarters to Baton Rouge, Louisiana.[7]

In July 1994, the company acquired the Asano Corporation, a sales and marketing company headquartered in Tokyo, Japan.[6]
