

Algiers electricity policy

Energy policy reflects the way the government addresses energy development issues, including energy production, distribution, and consumption. The attributes of an energy policy generally include legislation, international treaties, pricing, incentives, taxation, and energy conservation guidelines.

Algiers built its post-independence foreign and domestic policies on core principles designed to maximise state control, leveraging energy sales to manage foreign relationships and placate the population; preserving the military's independence through balanced international partnerships; and mediating rather than intervening in regional affairs.

Algeria, Africa's largest natural gas exporter, is making the most of a new era in great-power rivalry and an ongoing energy crisis. Having officially applied in November 2022 to join the BRICS...

This meeting is part of the implementation of the Memorandum of Understanding (MoU) on the strategic partnership between Algeria and the EU in the field of energy, signed in Algiers in 2013, which is aimed at developing and strengthening energy relations while respecting the balance of interests between the two parties.

The World Bank has had a longstanding strategic dialogue with Algeria on the sustainability of its energy sector. Technical assistance focuses on two key areas: supporting the development of a bankable wind energy program and assisting in the preparation of a strategy to promote renewable energy for various consumer types.

tion of electricity production chains, and the contribution to sustainable develop ...

Algiers electricity policy

Algeria, Africa's largest natural gas exporter, is making the most of a new era in great-power rivalry and an ongoing energy crisis. Having officially applied in November 2022 to join the BRICS group of emerging economies (Brazil, Russia, India, China, and South Africa), Algerian President Abdelmadjid Tebboune's administration signed up shortly after to extend Belt and Road Initiative projects with China on infrastructure, energy, and space exploration.
