Astronergy solar panels ranking

Top performers: Astronergy, JA Solar, Longi Solar, Runergy. The thresher test is a summation of a series of tests that places modules under a variety of vigorous environmental stresses to...

Astronergy Solar Panels were listed as a top performer for in 6 out of 7 test categories (thermal cycling, damp heat, mechanical stress sequence, hail stress sequence, LID+LETID and PAN performance) in the latest 2024 report. See full list of PV Evolution Labs Top Performing Solar Panels.

Top performers: Astronergy, JA Solar, Longi Solar, Qcells, Runergy, Trina Solar, Yingli Solar. The RETC thresher test includes a damp heat test that exposes modules for 2,000 hours, double the amount required for product certification. The test evaluates a module's ability to withstand prolonged exposure to humid, high-temperature environments.

Top performers: Aptos Solar, Astronergy, ES Foundry, Gstar, JA Solar, Longi Solar, Qcells, Runergy, SolarSpace, Trina Solar, and Yingli Solar. The thermal cycle test calls for cycling modules in an environmental chamber between two temperature extremes--85 C (185 F) on the high end and -40 C (-40F) on the low end.

Review left 1 years after system installed

The system has been an excellent investment. The panels are not visible from the front of the house.

Premium product backed by global manufacturing brand

Too early to comment on performance.

Review left 4 years after system installed

Hard to tell, just been installed

No issues at all. Runs as intended.

Review left 6 years after system installed
