

Asuncion retail store energy storage

Asuncion retail store energy storage

Supermercado Superseis Jap?n is a commercial retail development located in the San Vicente district of Asunci?n, Paraguay. It was developed by Retail S.A. and their subsidiary, Superseis, a premium supermarket chain with 25 locations across Paraguay. The chain has set itself up to be a pioneer for sustainability and renewable energy solutions in the retail sector in the country. Superseis Jap?n with its focus on energy-saving technologies and efficient use of water was designed to serve as a blueprint for future projects for the entire Superseis chain.

Through the use of energy-efficient solutions such as reflective paint and insulation for roofs and external walls, more energy efficient glassing and AC systems, solar hot water collectors, rainwater harvesting, LED lightbulbs and water-efficient plumbing features, the project was able to significantly reduce its energy and water consumption, resulting in a more sustainable construction project and a reduced carbon footprint.

Supermercado Superseis Jap?n has received Final EDGE Certification from Green Business Certification Inc. (GBCI).

Less Embodied Energy in Materials

Reduced window to wall ratio, reflective paint/tiles and insulation for roofs, reflective paint and insulation for external walls, external shading devices, low-E coated glass, air conditioning with air-cooled screw chiller, energy-saving light bulbs for sales areas, common areas and external areas, higher efficiency refrigerated cases, and solar hot water collectors.

Efficient flush for water closets, water-efficient urinals, aerators for faucets with auto shut-off, water low-flow faucets for kitchen sinks, water-efficient landscaping and a rainwater harvesting system.

Hollow core precast slab for floor and roof construction, steel-clad sandwich panel for roof construction, plasterboards on metal studs and ferrocement wall panels for internal walls, and aluminum window frames.

EDGE is currently funded by the UK Government with original funding by Switzerland's State Secretariat for Economic Affairs (SECO).

Additional support has been provided by Austria, Canada, Denmark, ESMAP, EU, Finland, GEF, Hungary, Japan and the Netherlands.

As part of the luxury shopping mall Paseo La Galeria, Danfoss has supplied a refrigeration control system for the supermarket "Superspies", and systems management for better energy efficiency in the food refrigeration application.
