

Backup power bridgetown

Backup power bridgetown

Base's innovative model allows homeowners to get all the benefits of backup without the high cost for the hardware.

When you switch to Base, you get a home battery for just the cost of installation, which is a fraction of the cost of other backup batteries or generators. We're able to do this because Base's solution allows us to get paid by the grid, rather than by homeowners. When the grid is up and running, the battery discharges energy when it is needed most. This allows the battery to pay for itself over time without the customer having to think about it. Savings are passed on to Base customers via the battery, low monthly energy bills, and zero service and maintenance costs.

When the grid goes down, the Base customer gets exclusive access to the stored energy to protect their home from power outages. On average, the Base battery maintains a 93% state of charge. Base's outage prediction technology fully protects customers from the vast majority of outages.

Base has two key pricing components:

Upfront Fee: The Base battery is a 20-50 kWh backup system, one of the largest home systems on the market. Comparable backup systems, including installation, cost approximately \$10K-30K. With Base, homeowners only pay a one-time installation fee. Base installation fee is typically \$3K, but is dependent on zip code. For the \$3K installation, Base offers 0% interest payment plans.

Base operates in select deregulated regions of Texas where you can choose your energy provider, including areas served by the following Transmission and Distribution Utilities (TDUs): Oncor, CenterPoint, TNMP, AEP, and Lubbock Power and Light.

Enter your address to check your home's eligibility and the timeline for installation.

The Base battery system is a 20-50 kWh backup system, one of the largest batteries on the market. The Base battery delivers up to 60 hours of outage coverage, which is dependent on household energy consumption.

Outage coverage can be extended with the use of solar or an affordable portable generator.

In the event of an outage, Base notifies customers of their expected battery duration, tips to extend their coverage, and a timeline for grid power restoration.

If you're a current customer and need support, please reach out to our toll-free number (866) 479-7697.
