The Kia EV6 joins other EVs from Hyundai and Genesis in a large recall.

The 2025 Lexus RZ EV costs between \$43,975 and \$58,605.

Porsche won't go all-electric as quickly as planned.

VW sees little payback for adding multi-speed transmissions to EVs--and other ways to boost efficiency.

The Kia electric truck related to the EV9 SUV still isn't a shoo-in for America--likely because of its potential price.

Kia ready with flexibility to favor EVs, hybrids, or plug-in hybrids--including future PHEVs with lots more electric range.

New electric-vehicle plant would be able to build up to 400,000 vehicles each year, when both phases are built.

It is an exciting time in the automotive industry with the development and evolution of new technologies for electric vehicles (EVs). Specifically, battery technology is the key driving force for innovation in the industry. Battery manufacturers must overcome the two major challenges to consumer adoption and growth of the market: total driving distance between charges and charge time.
