

Battery recycling ireland

Do you have electrical, battery or lighting waste? Recycle it FREE through our ...

The batteries regulations define three types of batteries:

If you are unsure about the type of battery that you are selling, you can use the battery scoping decision-tree to determine the type of battery.

A battery producer is any person or organisation that either manufactures or imports batteries or EEE incorporating batteries, and places them on the market in Ireland.

You are a battery producer if you do any one (or more) of the following in Ireland (including when using online distance selling):

Find out more about distance selling.

Important note: If you are importing vehicles with batteries, then you are a battery producer.

There is legislation for managing waste batteries in Ireland. This legislation sets out the rules and the legal obligations for anyone who makes, imports or sells batteries in Ireland. This legislation also sets the rules for the collection and recycling of waste batteries.

The legislation is as follows:

Download a copy of the batteries regulations

All battery producers must do the following:

Important note: If you are placing EEE on the Irish market and the EEE contains batteries, then you are an EEE producer and a battery producer. You will have to meet the obligations that apply to an EEE producer and a battery producer.
