It is an exciting time to be a clean energy technology company, especially in Georgia. Tax credits, grants and investments in the workforce are creating high-quality manufacturing jobs through the clean energy supply chain.

The state of Georgia is second in the nation in clean energy investments, with projects worth \$23.12 billion and creating almost 29,500 jobs. Since the Inflation Reduction Act and Bipartisan Infrastructure Law were passed, clean energy companies have announced more than 271,713 new jobs in 47 states, representing over \$352 billion in new investments. This law includes vital Investment Tax Credits for domestically sourced and manufactured standalone clean energy storage intended to lower costs, increase energy efficiency and strengthen energy security for America.

## Leading the Way to Energy Independence

Stryten Energy, headquartered in Georgia, offers advanced lead, lithium, vanadium redox flow or a hybrid of battery chemistries. With this range of technologies available, customers receive the optimal solution for their application and energy storage duration requirements. Stryten's battery technology strategy and investments continue to innovate, build and strengthen U.S. manufacturing and material supply chains for lead, lithium and vanadium batteries to ensure they are sustainable for years to come.

"The path to energy independence in the United States begins in Georgia. Stryten Energy is helping to create a domestic supply chain that will contribute to job growth and economic development," said Scott Childers, Vice President, Essential Power. "Domestic manufacturing of battery energy storage systems is a crucial part

## Battery technologies georgia

of creating a future of cleaner, abundant energy while ensuring energy security and resiliency for businesses, consumers and the country."

At the 2024 Georgia Technology Summit, Stryten Energy was recognized as a Top 10 Innovative Company in Georgia by the Technology Association of Georgia (TAG). This annual program recognizes Georgia-based companies of all sizes for their contributions to innovation and economic growth within the state's technology sector.
