

Battery testing cook islands

Battery testing cook islands

Our electrical technicians have the expertise to help you qualify your battery, ...

The Applied Technical Services Family of Companies (FoC) provides battery management systems BMS testing and certification services. Our battery testing personnel carefully evaluate battery management systems to ensure our clients' lithium-ion battery systems are safe and effective. We evaluate BMSs, conduct tests, and provide certifications verifying their functionality.

Performance Optimization

Battery management system certification helps to ensure a battery systems' safety, reliability, and performance. Certification verifies that the BMSs adhere to rigorous industry standards, preventing potential hazards such as overcharging and overheating. Certification increasing customer confidence in BMSs, improving the system's likelihood of success in the marketplace.

Environmental & Vibration Testing Equipment Manufacturer

These chambers are built in many different sizes and configurations to allow for a variety of battery types to be tested. Each chamber is fully customized and carefully crafted to match the test requirement for every product. Our customization process also secures your safety and delivers performance tailored directly to your needs.

Safety features ensure your technicians are never in harm's way. These features reduce the chance of an explosion and minimize the damaging effects of a spark-induced explosion. Here are some additional options available on your battery test chambers:
