Battle born batteries system kits

With 12V deep cycle batteries and supporting Victron components, these ...

Ready to upgrade your RV, van, boat, or off-grid solar setup to lithium-ion ...

With 12V deep cycle batteries and supporting Victron components, these Battle Born Energy Van Kits are perfect for your Van or Overland conversion. With the ability to charge from solar, shore, and directly from your rig's alternator, you'll never have to worry about power. And to sweeten the deal, all your components come pre-programmed too.

Looking for inspiration? Check out how our Van and Overland customers get out there and stay out there!

These Van Kits utilize the power of our flagship model, the Battle Born Batteries 100Ah 12V LiFePO4 Deep Cycle Battery:

Monitor, configure, manage, and update your Victron Energy equipment with the VictronConnect App. Victron Smart products connect to the app through Bluetooth, USB, WiFi, LAN, or remotely via the internet.

Description: The Battle Born GC3H is a 270Ah 12V Heated LiFePO4 deep cycle battery in a unique battery case and shape that changes the way large batteries can be placed inside RVs, on off-grid properties, vans, and more. Rather than a traditional battery size that needs to fit in a battery box, the GC3H can be placed anywhere. Utilizing the same stable LiFePO4 chemical composition and built-in battery management system technology as the entire line of Battle Born Batteries, the BBGC3H is one of the most unique deep cycle batteries on the market.

This 270Ah 12V GC3 deep cycle LiFePO4 battery uses a proprietary, low draw technology to keep your battery warm and ready to charge no matter what weather you may face. Weighing roughly 80lbs and with unlimited mounting possibilities, these 270Ah Heater Battery Kits are ideal for any application and maximizing your system's space and power. This battery is capable of being discharged to a 100% depth of discharge and can charge 5 times faster than lead-acid. The BBGC3H allows you greater flexibility for what you can power and how you install it and provides energy independence that other batteries cannot.
