Renogy Deep Cycle AGM Battery w/ Battery Monitor

Good RV batteries are critical to a successful RV camping experience. Similar to how a bad battery can wreck a fishing trip on your boat, a dead battery can ruin a camping trip in a hurry. In fact, many anglers will use one battery for the motor and one for running the electronics. These two types of batteries are not the same, and it is important to understand the difference. The same goes for RV batteries and car batteries--they aren't the same, and it's crucial to know what battery to buy for your rig.

There are four main types of RV batteries; wet cell lead acid, gel cell lead acid, absorbent gas mat (AGM) lead acid, and Lithium-ion (Li-ion). These four types of batteries also follow the same order for both performance and cost, with Li-ion batteries being the best-performing and most expensive. Your RV likely came from the factory with one of the first three types as the standard option; however, some of the higher-end RVs come with a Li-ion from the start. But before you head out on your next adventure, check your electrical systems, and if need be, replace your power source with one of the best RV batteries available.

Best Solar: LiTime 12V 200Ah PLUS Lithium LiFePO4 Battery

Best Premium: WEIZE 12V 100Ah LiFePO4 Lithium Battery

Best Innovative Design: Renogy Deep Cycle AGM Battery w/ Battery Monitor

I have over 30 years of experience with RV batteries in all different capacities. I've used and tested different types, styles, brands, and more to help power my own RV and other off-roading vehicles. My experience even goes further back if you take into account the years of using automotive and marine batteries. I've also used every type of RV, from pop-up campers to travel trailers to large motorhomes, and one thing is always the same--you have to have a quality battery for the electrical systems, or the trip is ruined. Here are a few things I look for in a good RV battery:

Best 12v battery for camper

Durability: How long will the battery last, and how much use can it withstand while still performing?
