Best aftermarket sony camcorder battery

If you're shooting with a recent Sony camera, odds are you're using NP-FZ100 style batteries. Sony's OEM battery is quite expensive, but is it worth it? In this guide, I'll take a look at some of the battery options for cameras like the a7R V, FX3, FX30, a7S III, and a1. There are many NP-FZ100 alternatives on the market today

Buying the official Sony battery that comes with your Sony a6000 (the NP-FW50 battery) is ideal. However, if you want a few of the official camera batteries, it starts to get a bit pricey. That's why I created this guide, which will show you some other aftermarket battery options for your Sony a6000.

Neewer NP-FZ100 Battery Set: <https://amzn.to/3fSlhqS>The Hyphenate does a detailed review of what he thinks are the best alternative third party NP-FZ100 batt...

Of all the third-party brands tested, the battery with the best value would be from DSTE. Not only does it last for a surprisingly long 2 hours and 23 minutes, but it only costs \$22. To be more specific, the DSTE battery has a price-to-performance ratio of \$9/hour, and it costs \$66 less than Sony's official offering.

Need some spare or replacement camera batteries? Here you'll find the top choices for Canon, Nikon, Sony, Fujifilm, and Olympus cameras. When you buy a new camera, it'll come with just one battery.
