5 Best Solar Phone Chargers Of 2024: Reviewed

Tom Price is an Associate Editor of Reviews for Popular Mechanics, and also contributes to Runner's World, and Bicycling. He has previously covered product reviews, startup news, and even professional wrestling. In his free time, he enjoys watching pretentious TV, low-brow movies, and exercising for beauty, not health. If you are interested in exploring more of his work, check out his website.

Adrienne Donica tested hiking, camping, and other adventure gear as Popular Mechanics' outdoors editor, before going on to edit gear reviews for Popular Mechanics, Runner's World, and Bicycling as Expert Reviews editor. Find her on the trail, working on her latest cocktail project, or eating mint chocolate chip ice cream.

ZDNET's recommendations are based on many hours of testing, research, and comparison shopping. We gather data from the best available sources, including vendor and retailer listings as well as other relevant and independent reviews sites. And we pore over customer reviews to find out what matters to real people who already own and use the products and services we're assessing.

When you click through from our site to a retailer and buy a product or service, we may earn affiliate commissions. This helps support our work, but does not affect what we cover or how, and it does not affect the price you pay. Neither ZDNET nor the author are compensated for these independent reviews. Indeed, we follow strict guidelines that ensure our editorial content is never influenced by advertisers.

ZDNET's editorial team writes on behalf of you, our reader. Our goal is to deliver the most accurate information and the most knowledgeable advice possible in order to help you make smarter buying decisions on tech gear and a wide array of products and services. Our editors thoroughly review and fact-check every article to ensure that our content meets the highest standards. If we have made an error or published misleading information, we will correct or clarify the article. If you see inaccuracies in our content, please report the mistake via this form.

Getting out in nature means disconnecting, but you may still want to bring your devices in case of an emergency or to take photos. The best way to keep devices charged when you're out in nature is with a solar charger.

What is the best home EV charger? Take a look at our top picks which include brands like Electrify America, Blink, and ChargePoint.

Solar chargers and power banks use the sun to generate electricity, so you don't need a wall outlet.

Best solar charger 2024

It's convenient, especially when inclement weather knocks out power.

You can use that electricity to power your devices, charging things like your mobile phone, laptop, fan, or car battery. We coupled our personal experience with thousands of real customer reviews to find you the best solar chargers and power banks.
