EcoWatch has helped thousands of homeowners go solar by helping them find the best providers for their needs, while also saving time and money.

Momentum Solar focuses its efforts on making the switch to clean energy as accessible, practical and effective for homeowners as possible. With simple services and an easy process, it's hard to find a better provider if you live in Momentum's region.

Though Momentum's service area seems small in comparison to the other names on this list, it restricts its growth intentionally, choosing to operate in states with favorable net metering programs and other effective solar incentives. By doing so, it ensures that customers within its service area are sure to secure a favorable and speedy return on investment (ROI), along with a smooth installation process.

It can also then focus more of its energy on service and quality than competitors with a wider national reach. Momentum offers a wide variety of financing options, virtual consultations and a start-to-finish process that remains in-house, rounding it out as one of the most effective and accessible companies for those who live in its regional coverage area.

Blue Raven Solar offers unique and innovative payment plans that sets it apart from other solar providers with similar services.

We like Blue Raven Solar because it understands that, for most homeowners, the cost of solar presents the biggest barrier to entry.

For that reason, Blue Raven Solar developed an innovative solar financing plan that offers in-house, flexible, zero-money-down options. The results speak for themselves, as Blue Raven Solar is now one of the

Best solar providers near me

fastest-growing solar companies in the nation and was recently acquired by SunPower. Its BluePower Plus+ plan (exclusive to Blue Raven) mimics the flexible structure of a lease while still providing the greatest benefits of owning your system.

Eligible homeowners enjoy 18 months of solar power before having to pay their first bill. When coupled with the federal solar investment tax credit (ITC), the initial energy savings can offset more than a third of the overall cost of a system before requiring a dollar down.
