Bms controls and energy ltd

EPBD - Energy Performance of Buildings Directive. BMS Controls and Energy ...

Reductions in insurance costs can also be negotiated with the fitting of a leak ...

BMS Controls and Energy Ltd is incorporated and registered in England ...

We have decades of experience in delivering clients turnkey project installations & maintenance of building management systems. It starts with our service and project teams getting to know your business inside-out so that they can offer you a tailored solution.

What's more, work with us and you'll have the same contact throughout your project to ensure a consistently good service.

As a BMS Controls Specialist company we employ experienced software, project and maintenance engineers that have carried out numerous Trend, Priva and Tridium projects throughout the country. We have also employed both project and maintenance sales engineers from the HVAC perspective.

Where required, sites can be connected (via ISDN or wireless router) to our established 24/7 bureau engineer.

Customer's sites are connected via modem with the customer's BMS operating system mirrored on our own secure IT network. System alarms can be configured to be automatically transmitted to the engineer to suit the sites and/or customer's requirements. For example:

BMS controls conduct high-level Building Energy Management System (BEMS) audits to evaluate the performance of the control system and to identify measures that will reduce energy consumption costs and carbon dioxide emissions

In addition to the existing preventative BEMS service and maintenance contract, we would also recommend that this be extended to include energy management support to provide a dedicated and targeted energy optimisation and savings service. Our BEMS orientated energy-saving recommendations when considered alongside other complementary initiatives can form part of your greater carbon and utility reduction strategy.

Platinum SML is our health and safety partner. Their services include risk assessments, audits and inspections and training. Our long-term membership with Platinum ensures that we always comply with current health and safety legislation, giving our customers peace of mind.

We're also Safecontractor Approved!
