California solar energy rabat

The average California solar shopper will save \$3,469 on solar panels with rebates and incentives.

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Sourced the majority of our data from hundreds of thousands of quotes through our own marketplace.

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

Solar panel systems in California are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment. Here's how you can lower the cost of solar if you live in California.

As a California homeowner, you have access to some great incentives that can substantially improve your return on investing in solar panels. The four incentives below are some of the most impactful ways to bring down your solar costs.

Residential Clean Energy Tax Credit, formerly the federal investment tax credit (ITC)

Disadvantaged Communities - Single-family Affordable Solar Housing (DAC-SASH)

Provides \$3/W for systems up to 5 kW if you're a low-income customer in a disadvantaged community

Allows you to finance your system typically with no money upfront and usually includes a low-interest rate
