

Caravan solar panels

Caravan solar panels

Caravan solar panels are becoming more popular, and they are the perfect option to give you more flexibility when using your caravan off-grid. Solar Power is also a great eco-friendly way of powering electronics and keeping your leisure battery topped up.

If you're looking for an easy, affordable and environmentally friendly solution to power all of those things that need electricity while on holiday, then look no further than solar-powered panels.

Charge your caravan up guilt-free with this easy-to-use solar panel kit that has everything you need.

Equipped with an inverter and lithium battery, you don't have to worry about bringing anything else with you on your journey.

This kit has the capacity of powering industrial caravans with a lithium rechargeable battery that cycles over 3000 times. Compared to standard lead-acid batteries, this is eight times more. You don't have to worry about it dying out either, as it provides 100% capacity for every use.

Bend the panel how you like as the thickness is only 2.5mm, allowing you to fit it onto surfaces that aren't completely flat. Due to this, you don't have to worry about it breaking as the strength is second to none.

To top it off, ECO-WORTHY offers a 1-year warranty and 24/7 technical support.

Take this complete solar panel kit with you on any journey with your caravan. The easy-to-use product has everything already connected, meaning all you have to do is take it out and start powering your vehicle once it's charged. You simply need to unfold your portable energy system, connect the crocodile clips to the 12V battery terminals, and allow the sun to work its magic.

Travel in any weather with the reassurance you'll still have power as the solar panels are completely waterproof, with an IP67 water protection certificate. It'll also always be protected from accidental damage with the sturdy storage bag made from a layer of foam.

Lightweight and foldable, it makes carrying the kit around easy as anything. You won't have to make masses of space for it on your trips, and it'll never get in the way of you enjoying your time in your caravan. Made from high-quality German materials, the monocrystalline solar panels will do everything you want and more.

This cost-effective solar kit is perfect for caravan owners who are just thinking about becoming more

Caravan solar panels

sustainable. You're provided with all the basics needed to power your vehicle, such as the solar panel, adaptor kit, charge controller, and tray cables.

Forget about the loud sounds that many generators make, as this product is known to have quiet power production on top of the benefit of grid independence. The panel uses 100% available solar panel, and you'll see the battery get completely charged up in no time. A 50Ah battery will reach maximum capacity in as little as 6 hours, leaving your caravan powered all night until the sunlight hits again.
