Here's to hassle-free charging! Thanks to the feedback from other EV drivers, the ...

Find all the answers to your questions about Chargemap products and services.

That one's right for you if you drive long distances frequently. You charge more than two times per month and the subscription fee already pays off and you fully benefit from the lower kWh price - equivalent to more than 300 km covered (with an average consumption of 20 kWh/100 km).

This one matches you, if you mostly take short to medium journeys. The low monthly subscription fee pays off already from just one charging session per month - equivalent to approximately 150 km (at an average consumption of 20 kWh/100 km).

With CONTACTLESS, you can charge your vehicle at all charging stations on the IONITY network. If you rarely travel long distances or only wish to use highway rates occasionally, IONITY CONTACTLESS is the right choice for you: no registration or prior planning needed, the rate allows for spontaneous charging.

The most sustainable era of mobility is coming, but much of its success hinges on electric vehicle (EV) charging capabilities.

With more than nine million EVs sold across Europe--accounting for around 12% of overall adoption, charging providers like these will provide consumers and businesses with the infrastructure to increase their use of electrified cars.

The leading portuguese EV charging station provider, Efacec was founded in 1948 and, with 2,400 employees, aims to create value through environmental commitment.

The business is a major exporter of original equipment to over 65 countries, developing solutions, such as motors, generators, transformers, and other electrical accessories for commercial EV charging.
