The subject that has generated the most interest is electromobility. The nation lags far behind, even its neighbours, especially when it comes to legislation that would make electric vehicles more widely available.

Albania receives no VAT payments, and incentives are given by Croatia, Serbia, Slovenia, and Montenegro. Nothing is occurring anywhere but in Kosovo and our country.

Infrastructure is a comparable situation. In BiH, there are only approximately 80 charging stations and roughly 60 electric vehicles, which is not enough. The electric car is popular all around the world.

Although it is still a costly sport, European policy is quite clear and it has significant positive consequences. They do away with fossil fuels from transportation in this way.
