

## Colombia smart grid

La Unidad de Planeaci?n Minero Energ?tica - UPME pone a disposici?n del p?blico en general los estudios realizados en el marco de la cooperaci?n t?cnica ATN-KK-14254-CO (CO-T1337) con el Banco Interamericano de Desarrollo - BID, el Ministerio de Minas y Energ?a y el Ministerio de Tecnolog?as de la Informaci?n y las Comunicaciones, sobre el mapa de ruta para la implementaci?n de redes inteligentes en Colombia, realizados con el aporte de fondos provenientes del Fondo Coreano para Tecnolog?as e Innovaci?n.

Parte 1&#58; &#160;Documento con la visi?n general del estudio, con un resumen de los an?lisis, resultados, conclusiones y recomendaciones.

Parte 2&#58; &#160;Documento con los an?lisis y resultados para definir el mapa de ruta de la implementaci?n de redes inteligentes en Colombia.

Parte 3&#58; &#160;Documentos con los an?lisis de pol?tica y regulaci?n de los sectores el?ctrico (parte 3A) y de TIC?s (parte 3B), para la implementaci?n de redes inteligentes en Colombia.

Parte 4&#58; Documentos con los anexos de todo el estudio.

Policies and ethics

This paper focuses on providing a functional analysis of smart grids, with the purpose of establishing a framework to identify the main characteristics of the current electric interconnection system in Colombia. It also names the positive incentives proposed by the Colombian government to support both research and development projects that implement non-conventional energy sources and promoting energy management based on efficiency.

An architecture model that describes the components interoperability of a smart grid is presented using a descriptive methodology.

The results include a list of the objectives established by the Colombian public and private entities related to energy development, specially focusing on the opportunities to provide some kind of artificial intelligence to
