Cornerstone Technologies has what it takes to deliver data intelligently, exactly where ...

Cornerstone boasts a cast of professionals all with complementary skillsets and backgrounds. Despite the differences in expertise, we're all bound by one thing: our unwavering commitment to excellence in service.

Cornerstone Technologies has what it takes to deliver data intelligently, exactly where it needs to be. Our only job is your vision, your need, or your issue to patch. We see it through that we build what you need, with assurance you have our full spectrum of attention and expertise every stop of the way.

In a world filled with threats of data-breach, restless competition, and technological pitfalls of all kinds, Cornerstone Technologies has been entrusted with the necessary know-how since 2007 to execute on your desired vision and be that integral piece of your IT infrastructure you needed all along.

There has never been a project too obscure, nor too advanced for us. From hybrid cloud migrations, cybersecurity, managed services, or any engineering augmentation for your information systems framework, we can be that building block so your data foundation doesn't fall, and where you can be free to build as large as you like. An engagement with Cornerstone has always meant a specific, yet simple experience for our customers. Our team takes the time to hear you out and listen fully, so you can see your vision come to life and your data take shape--safely and securely.

When Visa trusted us to be their partner for global backups in 2008, we adapted and engineered the right solution at the right time on the largest scale, and we haven't stopped since. From enterprise to small business, cloud migrations to predictive data modeling, Cornerstone fits in where a one-size-fits-all service simply does not.

Our team of highly skilled professionals have seen projects of all sorts, servicing organizations of all sizes and industries, including FinTech, Education/ Schools, State/ Local Government, as well as Software, among others. With our far-reaching track record, we encourage you to reach out with any IT questions or cases, so we can prove to you our reputation of getting the right thing done for the right company.

Michael's journey is marked by his relentless drive and innovative spirit in mechanics, technology, and infrastructure. His leadership and ingenuity have propelled him to new heights, culminating in the founding of Office Automation Group, Inc. in 2001, which serves Technology Infrastructure needs across the United States. His acquisition of Cornerstone Technologies is now showcasing unwavering commitment to excellence in service.

From a young age, Michael has been a proactive leader. At 14, he started digging ditches to help pay his

Cornerstone technologies inc

parents" mortgage, and by 15, he had launched a lawn mower repair business. His dedication continued as he played a role in the United States Marine Corps, by being one of the first 720 troops on the ground in Saudi Arabia and participating in Task Force Ripper which liberated Kuwait City during the Gulf War. Michael has always led from the front, unafraid to go the extra mile to accomplish the mission.

After nine years of service in the Marines and a medical separation, Michael earned a Bachelor of Science Degree in Management with a Minor in Computer Science from North Carolina State University. His career has been characterized by leadership roles, from managing small landscaping crews to leading Marines in combat, corporate departments, and now two successful companies.

Michael holds advanced technical certifications in Information and Communications Technology as a Registered Communications Distribution Designer and Wi-Fi Systems Engineering, underscoring his expertise and commitment to excellence in his field.

After serving as a member of Cornerstone Technologies" Board of Directors for a long while, Skip McCormick accepted the full-time role as Chief Technology Officer and Artificial Intelligence Practice Lead, pioneering efforts to service the many advanced and complex needs of our clients.
