Demand response is rapidly evolving from an "emergency resource" to a versatile, real-time grid management tool for meeting peak demand without relying on costly peaker plants or mega-investments in new generation assets. One company alone, Enel X, has blazed the trail in demand response, making it the most reliable and flexible alternative for cost- and environmentally-conscious utilities.

DR capacity with utility partners

first exclusive DR utility partnership

C& I customers in North America

Whether you need a software partner to help you execute your demand response program or a fully outsourced solution provider to manage every aspect, Enel X has the technology, expertise and experience to make your program top-notch. Our capabilities span the demand response lifecycle, including:

SRP meets growing electricity demand in Arizona without new power infrastructure, while improving sustainability.

Enel X optimizes peak demand usage and delivers 100 MW demand response portfolio for Ameren Missouri.
