Easee Charge is intelligent and adapts to all electric vehicles, power supplies and ...

Have you bought an electric car, or are you planning to do so? Then you need a home charger that can handle safe, fast and smart charging.

Easee EV charger is a smart home charger that automatically adapts to all electric cars, currents and power grids. The EV charger is packed with technology and safety features, but is very easy to use.

Check the status of your charger, adjust charging power and schedule charging sessions.

We have five different colour covers to choose from. Change cars or paint the house? Don't panic, just replace the cover!

Our EV chargers can withstand all types of weather conditions and needs no extra protection from sun, snow, wind or rain. With IP54 certification, 11 sensors and intelligent temperature measurement, the charger will always keep you and your home safe.

Yes. Our EV charger fits all cars and power grids. It adjusts automatically so you can safely sit back and recharge your batteries.

It is difficult to answer, since the price of electricity varies from hour to hour. But the EV charger is packed with technology that will enable it to charge when the power is cheapest.

Get the most out of your Easee EV charger with our range of accessories. All our products are developed in Norway and are designed to withstand harsh Nordic weather conditions.

Premium cable holder. Acid-resistant steel that is hand-polished.
