

## Electric car manufacturers in germany

The electric vehicle industry in Germany is a vibrant and evolving sector. The companies operating in this field are primarily concerned with manufacturing electric vehicles, providing mobility solutions, and developing charging infrastructure. These organizations aim to ease the transition towards electric mobility, meeting the rising demand for sustainable transport. Amid increased environmental consciousness, Germany's electric vehicle companies are playing a pivotal role, taking innovative strides towards greener solutions and shaping the future of transportation.

Mercedes-Benz Mobility offers electric mobility solutions and a wide range of career opportunities. They provide financing, leasing, payment services, insurance, and fleet management for electric cars. With a customer-centric approach and core values, they aim to meet the needs of individuals and businesses looking to switch to electric vehicles.

Aiways is a company that focuses on providing solutions for electric vehicle (EV) charging. They aim to ease the EV experience by implementing improvements in charging details. Their flagship model, the Aiways U6 SUV-Coup?, showcases these improvements. The company also emphasizes software enhancements, which are developed in their own IT hub in Munich.

DKV Mobility is a company that offers comprehensive mobility solutions to businesses and individuals. Their services include fuel cards, toll services, fleet management, and electric vehicle charging solutions.

TIER.app is a company that provides an energy network app. It offers sustainable mobility solutions with a focus on electric scooters and bikes.

Accumotive GmbH & Co. KG is a company that specializes in the production of batteries for electric vehicles. They offer innovative and sustainable energy solutions for the e-mobility sector. The company is a leading manufacturer in the technology industry and is part of the Mercedes-Benz Group AG.

Autel Energy is a company that specializes in providing electric vehicle (EV) charging solutions. With a wide range of AC and DC charging products, Autel Energy offers an all-in-one charging solution for residential, commercial, and public use. Their intelligent and award-winning EV chargers are easy to install and compatible with nearly all electric vehicles and hybrids. Autel Energy is committed to powering the future of green energy and is at the forefront of the EV revolution.

Renault is a car company that offers a range of vehicles, including electric and hybrid models. They provide full-service contracts and a variety of financing options. Explore their lineup of cars, SUVs, and vans on their official website.

# Electric car manufacturers in germany

Compleo Charging Solutions AG is a premium manufacturer of charging stations for electric vehicles. As a Compleo partner, you can purchase charging stations and accessories through their online shop and install them for your customers. They offer competitive prices and convenient ordering options, making it easy for partners to access their wide range of products. By partnering with Compleo, electricians and installers can gain access to new customers and contribute to the development of the electric vehicle charging infrastructure across Europe.

StreetScooter is an electric vehicle company that focuses on the production and development of electric transporters. They offer a range of electric vehicles for commercial use, including delivery vans and utility trucks.

EVUM Motors is an international electric vehicle manufacturer specializing in the production of the aCar, a robust and compact electric transporter. With a range of 91-110 km, the aCar is ideal for a wide range of applications, including municipal tasks, intralogistics, forestry and agricultural use, as well as in the tourism and trade sectors. It offers an environmentally friendly and cost-effective solution for commercial transportation.

Quantron is an e-mobility company specializing in the development and production of electric vehicles for passenger and freight transport. They offer a range of electric vans, trucks, and buses, providing sustainable and environmentally friendly transportation solutions. With a focus on reliability, energy efficiency, and innovation, Quantron is driving the future of clean mobility.
