Electric vehicle costs cook islands

Government will retain and distribute eight electric vehicles (EVs) it previously tried to sell due to lack of bids likely caused by affordability concerns. These eight EVs were part of a larger purchase of 25 Hyundai Ioniq electric cars acquired for the Pacific Islands Forum Leaders Meeting held in Rarotonga last November at a cost of \$1.7 ...

The 25 Hyundai Ioniq electric vehicles, which cost the nation \$1.7 million, are parked at the Prime Minister's office for security reasons. Government has confirmed some of them will go to tender next week. The vehicles are pictured during the first trial of the Pacific Islands Leaders motorcade movement last month. Cook Islands Government will retain and distribute eight electric vehicles (EVs) it previously tried to sell due to lack of bids likely caused by affordability concerns.

These eight EVs were part of a larger purchase of 25 Hyundai Ioniq electric cars acquired for the Pacific Islands Forum Leaders Meeting held in Rarotonga last November at a cost of \$1.7 million (US\$1.2 million).

However, "none of the EVs were sold during the tender process," confirmed Financial Secretary Garth Henderson in a statement, following inquiries from Cook Islands News.

Henderson said the Government then decided to retain and distribute electric vehicles across its agencies.

"Given the governments ageing fleet and constrained budget for vehicle replacements, a decision has been made to retain the EVs and distribute them across government agencies requiring vehicle support to sustain core business and delivery operations," Henderson said.

"In this way, Government will continue to lead the way in its continued efforts towards clean green

transportation and lowering vehicle emissions."

According to the statement, the EVs for sale, the Hyundai IONIQ Electric 38.2kW Entry models, are well known for their eco-friendly design, energy-efficient performance, spaciousness and comfort, and excellent fast-charging capability.
