Discover the top electric car models to look out for in Nepal in 2023-2024. From Tata ...

Despite proactive governmental measures, the trajectory of electric vehicles in Nepal ...

To encourage the adoption of electric mobility, the Nepal government has implemented several policy measures and incentives:

These benefits allow electric cars to have significantly lower operational costs compared to petroleum-powered vehicles. More benefits and incentives are likely to be introduced under the Electric Vehicle Policy Draft 2022 released by the Ministry of Industry, Commerce and Supplies.

Imported EVs typically retail for Rs 30 – 60 lakhs in Nepal depending on the model and features. But the good news is that prices are predicted to fall steadily as EV technology matures and sales volumes increase globally. More affordable electric cars under Rs 20 lakhs are likely to launch in Nepal by 2025.

Here are some of the most popular electric car models currently available in the Nepali market from authorized dealers:

The Nissan Leaf pioneered affordable and practical mainstream EVs when it first launched globally in 2010. The updated 2022 model comes equipped with a 40 kWh battery pack with a decent real-world range. Lower running costs compared to fuel vehicles make it a good option despite higher upfront prices.

The popular ZS EV crossover from MG Motor arrived in Nepal in 2021 and has been selling steadily. It offers an excellent range from its large 44.5 kWh battery and comes packed with premium features like a panoramic sunroof and an 8-inch infotainment screen.
