

Electric vehicle incentives ukraine

Among other incentives for switching to electric transport:

As noted above, tax incentives are simple but highly efficient drivers of the Ukrainian EV market. The Ministry of Infrastructure of Ukraine - the highest governmental body that initiates and supports legislative developments facilitating the deployment of EVs in Ukraine. The Ministry has set a target to increase the share of EV sales to 15% ...

The tax incentives amendments include: - The exemption on import Value Added Tax (VAT) and customs duty for between 1 January 2022 and 31 December 2030 for all equipments and spare parts for manufacturing of EVs, electro buses and electric cargo vehicles, as well as vehicles using natural gas or biogas;

With fiscal incentives in place, electric car ownership in Ukraine has been growing fast in the last three years. What are the main developments and challenges of this emerging market for Ukraine? As of 1 September 2021, there were 30 062 electric cars in Ukraine, featuring a 20% increase over the last half-year. Apart from environmental ...

In 2023, Ukraine saw a sharp increase in electric vehicle sales, with over 54,800 EVs purchased in the first 8 months --more than the total sold in 2022. In August 2024, a record 6,714 EVs were registered, an 80% increase compared to 2023. Amid power outages, EVs are being used for transportation but also to power homes.

To support and enable the Government of Ukraine to make the transformative shift to decarbonize transport systems by promoting electric mobility at national scale

The Global Environment Facility (GEF) is a multilateral fund dedicated to confronting biodiversity loss, climate change, pollution, and strains on land and ocean health. Over the past three decades, the GEF has provided more than \$22 billion in financing and mobilized another \$120 billion for more than 5,000 national and regional projects.
