MG4 EV is an affordable electric hatchback packed with innovation, style and up to an impressive 323 miles of driving range.

Hi Sham, I take this opportunity to express my sincere gratitude to you for your excellent customer service during my recent purchase of the MG HS PHEV. From the moment that Nalini and I entered the showroom, we were warmly greeted by you and given your full attention. You addressed our questions with great attention to detail and helped us to make a great decision to purchase this vehicle for our daughter, Christiane.

I am extremely pleased with my purchase of the MG HS PHEV, when I look at the way the world is moving technology wise, it was only natural that my next vehicle be hybrid in nature. My job requires me to do a lot of driving and since my purchase of the MG HS PHEV I make significantly less trips to the pump now which I love. The 61km range on full battery is great for me & I love the modern / sporty finish of the vehicle.

My experience with MG thus far has been great. From the beginning, interacting with two very experienced and versed sales people Mark and Gillian, to now owning a MG HS PHEV .The service received from both Mark and Gillian was impeccable. Now to the vehicle, the features are excellent and true value for money. I would have purchased a HS PHEV to conserve fuel/money and do my small part to conserve the environment.
