Enquire now and let us help you make an informed decision before making a purchase.Qatar Power Market DynamicsQatar is a prominent natural gas-based economy in the Middle East. It is classified as a high-income country and has the highest levels of per-capita energy consumption among the Gulf Co-operation Countries (GCC). Oil and natural gas exports are the primary sources of revenue, as Qatar possesses substantial reserves of these fossil fuels.

In 2021, the country's power market deals were dominated by debt offerings, followed by debt acquisitions.
