

Electricity market venezuela

2. Introduction2.1 Venezuela Power Market2.2 GlobalData Report Guidance

3. Venezuela Power Market, Snapshot3.1 Country Summary3.2 Macroeconomic Factors3.3 Supply Security3.4 Opportunities3.5 Challenges3.6 Impact of COVID-19

4. Venezuela Power Market, Market Analysis4.1 Market Structure4.2 Key Market Players4.3 Financial Deals– Deal Value and Volume, 2010-2018– Deals by Type, 20204.4 Venezuela Power Market, Demand Structure– Power Consumption by Sector, 2020

5. Venezuela Power Market, Regulatory Scenario5.1 Thermal Power Policy5.2 Venezuela Development Plan for the National Electric System, (Plan de Desarrollo del Sistema Electrico Nacional (PDSEN) 2013-20195.3 Electric Service Law5.4 Electricity Law5.5 National Renewable Energy Registry5.6 Law on Rational and Efficient Use of Energy5.7 Nationally Determined Contribution (NDC) to the Paris Agreement5.8 Sowing Light Program (Sembrando Luz)

6. Venezuela Power Market, Capacity and Generation6.1 Cumulative Capacity Share by Technology, 20206.2 Total Power Capacity and Generation, 2000-20306.3 Thermal Power Capacity and Generation, 2000-20306.4 Hydropower Capacity and Generation, 2000-20306.5 Renewable Power Capacity and Generation, 2000-2030

7. Venezuela Power Market, Transmission and Distribution Overview7.1 Transmission Network7.2 Distribution Network7.3 Electricity Import and Export7.4 Grid Interconnection

8. Venezuela Power Market, Major Generating Companies8.1 Corporacion Electrica Nacional SA– Company Overview– Business Description8.2 Petroleos de Venezuela SA– Company Overview– Business Description– SWOT Overview8.3 Corporacion Venezolana de Guayana– Company Overview

9. Appendix9.1 Abbreviations9.2 Market Definitions– Power– Renewable Power– Installed Capacity– Electricity Generation– Electricity Consumption9.3 Methodology– Coverage– Secondary Research– Primary Research– Modelling and Forecasting

Frequently asked questions What is Venezuela"s total cumulative power capacity? Venezuela’s total cumulative power capacity in 2020 was 33.86 GW.

The power generation segment in Venezuela is dominated by Corporacion Electrica Nacional SA (CORPOELEC). This is followed by Petroleos de Venezuela SA (PDVSA), Compania Anonima de Administracion y Fomento Electrico, and Corporacion Venezolana de Guayana.

Thermal power was the dominant source of power in 2020, accounting for more than 50% of total installed capacity.

The Ministerio del Poder Popular para la Energí[a Eléctrica](#); The Ministry of Popular Power of Electricity (MPPEE) oversees formulating and implementing energy policies in Venezuela.
