

Electricity rates pakistan

Electricity rates pakistan

?, ?, 12, ? 42 ?

Prices differ with respect to number of units consumed. There are unit slabs against which cost is different.

Electricity Per Unit Price in Pakistan Today is Rs. 4.10 to Rs. 34 depending on the number of units slab. Cost is increasing in Pakistan, in this scenario you should know how much it costs and what is the per unit electricity rate in Pakistan 2024. Electricity which is commonly called Bijli in national language of Pakistan. It is supplied through divisional electric supply companies all over the country in Punjab, Sindh, Balochistan and KPK provinces. There is little difference in prices per unit.

NEPRA, The National Electric Power Regulatory Authority is controlling and regulating the electricity supply in Pakistan. NEPRA decides and provides suggestions to increase or decrease the rate of electricity to the government of Pakistan.

Though in bill calculation section you can easily see per unit rate of electricity we are providing information about prices of all electric supply companies in Pakistan. Electric supply companies are working under the WAPDA, Pakistan Water & Power Development Authority. WAPDA is maintaining power and water resources in Pakistan.
