

## Electricity safety paramaribo

We are very satisfied with the Trane air conditioning system that Elgawa installed in our home. The split units cool very well. They are quiet and energy efficient. Since the installation in 2018, we have never had any problems and the system requires very little maintenance. Elgawa delivers quality and we highly recommend them as a supplier and installer of cooling systems.

**Total Area (km<sup>2</sup>):** It includes a country's total area, including areas under inland bodies of water and some coastal waterways.

**Population:** It is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship--except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin.

**Rural Population (% of total population):** It refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

**GDP (current US\$):** It is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

**GDP Per Capita (current US\$):** It is gross domestic product divided by midyear population

**Access to Electricity (% of population):** It is the percentage of population with access to electricity.

**Energy Imports Net (% of energy use):** It is estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

**Fossil Fuel Energy Consumption (% of total):** It comprises coal, oil, petroleum, and natural gas products.

After Trinidad & Tobago, and Cuba, Suriname comes in as the 3rd largest oil producer in the Caribbean.

Suriname is a Small Island Developing State (SIDS).

According to REEEP (2013), Suriname has small amounts of fossil fuels reserves, which are mostly exploited by the government-owned company "Staatsoli". The country has a refinery, which has a production capacity of

## Electricity safety paramaribo

about 7,500 barrels/day;With regard to these numbers, it is comprehensible that, amongst the Caribbean countries, Suriname is the least reliant on fossil fuels for electricity generation;
