Support

Enel X JuiceBox is a technological, digital and tailor-made solution designed for your domestic needs and lifestyle. Our family of electric vehicle chargers - JuiceBox, JuiceBox Plus and JuiceBox Pro - come with different configurations for power, socket and connectivity. Connected to Enel X's charging software platform, JuiceBox provides access to a wide range of smart functionalities. Access all features directly from your smartphone with the JuicePass app; from remote management of your station to charging optimization - anywhere, anytime.

Our baseline model for smart charging. Use the JuicePass app with Wi-Fi connectivity to control your charging sessions.

Power, output and connectivity variations to suit your lifestyle. 100% recycled material case.

Power, output and connectivity variations to suit your lifestyle. Ability to optimize its energy consumption. 100% recycled material case.

JuiceBoxPlus (11 kW model) is eligible for the KfW440 program. The Federal Ministry of Transport and Digital Infrastructure's KfW440 program offers a grant of EUR900 towards the purchase and installation of charging stations in privately used parking spaces in residential buildings.

Who is eligible: Homeowners, homeowners' associations, tenants and landlords. This grant is not available for charging stations for commercial use. Full details including terms and conditions

JuiceBox Plus and JuiceBox Pro are designed to fit our corporate vision for sustainability. With a 100% recycled case, both models can also be recycled at the end of their useful life.

In 2020, 60 tons of plastic waste were used to manufacture 30,000 JuiceBoxes.

Additional sustainability is provided by JuiceBox Pro's ability to adapt its output to the available power on the meter makes more efficient use of energy and improves energy capacity for the grid. Features like these are part of The Enel X Circular Economy Boosting Program, a company-wide approach to assess and increase both the level of circularity in our solutions portfolio and our clients' Circular Economy maturity. The
