

## Energy management bucharest

As part of ENGIE Romania, one of the main energy suppliers in the country, the Global Energy Management & Sales Romania platform based in Bucharest is offering a range of services: risk management services, gas and power supply, asset optimization and green services.

ENGIE Global Energy Management & Sales Romania is a leader in the energy transition process by providing unique solutions to its clients to control risks, manage power generation and green certificates, access the market and achieve their decarbonization targets.

Our dedicated team is fully operating in Bucharest since 2012 and is formed by enthusiastic and dedicated professionals, fully equipped to navigate digital, data analysis and market trends. We have a significant knowledge of market design due to our combined professional and academic backgrounds, our expertise and business knowledge.

ENGIE Global Energy Management & Sales provides energy supply solutions and risk management services to support its clients through their decarbonization journey, while optimizing ENGIE's assets and contributing to value creation.

The Agency for Energy Efficiency and Environmental Protection (AEEPM) is an independent legal entity, founded in 2007, at the initiative of the Local Council of Sector 1 of Bucharest, co-financed by the European Commission through the Intelligent Energy Europe Programme.

The Agency for Energy Efficiency and Environmental Protection (AEEPM) is an independent legal entity, founded in 2007, at the initiative of the Local Council of Sector 1 of Bucharest, co-financed by the European Commission through the Intelligent Energy Europe Programme. It is a separate legal entity with its own statutes and is established as an NGO.

The Agency is a management unit for local, regional and national projects in the field of sustainable development, sustainable energy and environmental protection. The members of the organization are groups of consumers, producers and distributors of energy, social and business organizations and public authorities interested in implementing measures and action plans for the rational use of energy, as well as the development of renewable energy projects.

The Management Board is composed by representatives of public administration and private businesses and industries, as well as concerned associations, research bodies and universities.

# Energy management bucharest

The Agency was founded with the aim to setup a legal entity respected in the community of Bucharest, capable to capitalize expertise and capable to influence local and regional policies regarding energy use and new sources for green energy.

The main objectives of the Agency are related to the sustainable development of local communities:

The activities of AEEPM are centered around renewable energy sources and the environment. It serves as a management unit for projects in those fields.
