The Ministry of Environment, Energy and Climate Change (MEECC) hosted its second press conference for the year on Friday where Minister Wallace Cosgrow and his two principal secretaries - Wills Agricole (Energy and Climate Change) and Alain Decomarmond (Environment) talked about the ongoing projects.

The press conference, held at the ministry's headquarters at Le Chantier Mall, formed part of activities to commemorate Environment Day.

Minister Cosgrow highlighted the importance of the World Environment Day which had as theme: "Biodiversity".

"This is a very important day on the calendar of the ministry. The theme is very fitting for Seychelles and it is very important for us to rethink our interaction with nature now and how our future generations can benefit from nature also! The MEECC has been working on various projects including strategies since the beginning of the year. We are, today, providing you all with updates on all these policies and strategies which are important for us at this moment."

He also noted that already 30% of our seas have been designated as nature reserve and they are currently working on the framework.

Environmental Performance Index (EPI) - Seychelles ranked 1st in Sub-Saharan Africa

Minister Cosgrow also announced that "the results of the Environmental Performance Index (EPI) was announced on June 4, 2020, where Seychelles was ranked 38th out of 180 countries worldwide and top in Sub-Saharan Africa. Seychelles was also ranked first on climate change actions.

The EPI is a method of quantifying and numerically marking the environmental performance of a state's

policies. It identifies targets for several core environmental policy categories and measures how close countries come to meet them. It is jointly implemented by two US Universities (Yale/New Haven and Columbia/New York) and has been commissioned by the World Economic Forum/Davos.

- Waste Management and Glass Recycling Projects (Waste Enforcement and Permit Division)

PS Decomarmond noted that last year they had a long consultation process to draft a master plan for waste management with the different stakeholders.
