Energy solutions solar

Founded on the vision of sustainable energy, ESAS provides innovative ...

From the initial quotes and my thousands of questions, to getting the install started sooner than expected, and all the work that went into the install. Went with a Powerwall (only ones that have stock of these) and Span Panel (one of the first in the area)...

...We have saved about 1/2 on our electric bill since the installation...the install is on the side of our roof and a portion of the back/side. Most people do not even know that we have the panels... We would recommend this company highly!

Solar Solutions installed a sophisticated solar system replete with backup battery, at my home... saving me money, preventing several blackouts...They are now contracted to install a similar system for my business, and they have been exceptionally patient...

...SES designed a system tailored to our specific needs and... We rarely have an electric bill for anything above the basic service fee...In terms of courtesy, flexibility, diligence, honesty and knowledge of the field, we cannot imagine a more capable group.

...They were meticulous in panel placement, neat, and professional in their conduits and wiring, panel alignment... The system is operating flawlessly... Given the number of grid outages...I will shortly be working with Patrick to develop some proposals for battery backup...

I reached out... and was introduced to Eric (the sales rep). Wow what a difference. No slick approach. No hard pressure. Just the facts and boy was Eric patient with all our questions. We went with them because Eric...really coached us on solar energy production.

Energy Solutions and Supplies (ESAS) was founded with a vision to drive the clean energy revolution by delivering high-quality solar PV products and expert consultation services. Since our inception in 2020, we have grown into a trusted partner for businesses seeking innovative and sustainable solar solutions. From large-scale distribution to tailored engineering services, we provide end-to-end support to Engineering, Procurement, and Construction (EPC) companies, investors, and developers across the globe.

Our commitment goes beyond just supplying solar components. We actively contribute to environmental sustainability through our comprehensive reclamation and recycling services, ensuring the responsible disposal and recovery of solar PV modules and batteries. With a focus on excellence, we continue to empower projects of all sizes, helping our clients transition to a greener future while maintaining the highest standards of quality and service.

Energy solutions solar

To empower our clients with reliable, high-quality solar solutions while championing sustainability and environmental responsibility. Through expert consultation, efficient distribution, and eco-friendly reclamation, we help the energy sector achieve its clean energy goals and move closer to a greener, sustainable future.

To lead the energy sector in enabling businesses and their customers to reach energy independence and efficiency through innovative and sustainable solutions
