

# Energy storage battery 150 kWh

Energy storage battery 150 kWh

,?,:?,,?,,?,,...

If you need a larger capacity energy storage system, you can choose to combine two, three or up to five 150 kWh batteries in parallel. The wiring diagram of the combination is also very simple. It is easy for you to adjust the battery capacity at any time during use.

Safety & Reliability

Cost-Effective & High Efficiency

Safe and Reliable Intelligent control system, independent management of battery cluster, unique fault diagnosis system, quick fault location and analysis and self-recovery.

Simple and Flexible Simple and compact structure, diversified configuration, flexible application in micro grid, PV storage and charging integration, multi-application.

Cost Effective Support peak cutting and valley filling and power quality control at power supply terminals.

HV Commercial Solar Battery Storage

Unlock the full potential of your business with our state-of-the-art high-voltage battery systems, providing you with the most efficient and reliable energy storage options on the market. Developed with cutting-edge LiFePO<sub>4</sub> (LFP) technology, our 100kWh /110kWh /120kWh /130kWh /140kWh /150kWh/160kWh / batteries are specifically designed to meet the needs of commercial and industrial applications.

Choose from Three High-Capacity Options

Our high-voltage ESS battery product line offers six powerful capacity options to meet your unique energy storage needs:
