

Energy storage battery products 570 kWh

Energy storage battery products 570 kWh

Highly integrated ESS for easy transportation and O& M

Pre-assembled, no battery module handling on site

8 hour installation to commission

DC electric circuit safety management includes fast breaking and anti-arc protection

Intelligent leak protection and liquid refilling system

Intelligent liquid cooled technology ensures higher efficiency and longer battery cycle life

Modular design supports parallel connection and easy system expansion

Fast state monitoring and faults record enables pre-alarm and faults location

Integrated battery performance monitoring and logging

A greener solution for a more efficient performance.

Our mid-node 250 kW/575 kWh Battery Energy Storage Systems (BESS) are designed to satisfy a variety of on and off-grid applications, enabling reduced emissions and costs. With their fully integrated, plug-and-play design, they can supply power in the most demanding situation, offering flexibility, reliability and efficiency, without any required capex. These batteries can be operated in island mode, as a part of a hybrid solution with a generator or in parallel with additional BESS, and is ideal for renewable power applications.

A complete mid-node battery energy storage system (BESS) with everything you need included in one container
