Jul. 10, 2023Marubeni Corporation

In June 2023, Marubeni Corporation (hereinafter, "Marubeni") contributed additional funding to Skeleton Technologies Group OÜ of Estonia (hereinafter, "Skeleton"), a developer and manufacturer of supercapacitors*, for the construction of a mass production plant for the upcoming next-generation storage "SuperBattery";

Skeleton is the largest European manufacturer of supercapacitors, which are energy storage devices delivering higher power and significantly faster charging and discharging than batteries. Amid the growing trend toward electrification in all industrial sectors to realize a decarbonized society, Skeleton is expanding its business and customer base, which already includes Siemens, General Electric, and Shell, as well as major automobile and heavy electric machinery manufacturers, mainly in Europe and the United States.
