

## Energy storage for resilience cook islands

The Small Island Developing States Lighthouses Initiative Annual Progress Report 2023 summarises the remarkable achievements of SIDS in their sustainable energy transition from the year 2021-2022 and documents the efforts to move from pledges to action in energy transition and climate resilience.

### SIDS Lighthouses Initiative Progress and way forward

This SIDS Lighthouses Initiative (LHI) Annual Progress Report provides an overview of energy transformation and implementation progress in small island developing states (SIDS). Notably, the political commitment to renewables among SIDS remains unwavering despite the setbacks generated by the COVID-19 pandemic.

This SIDS LHI progress report provides an overview of SIDS energy transformation since the initiative's launch in 2014. It highlights key developments in the energy transformation undertaken jointly by SIDS and development partners, as shared with IRENA and featured on the associated knowledge-sharing platform.

### SIDS Lighthouses Initiative Progress and way forward - 2020

The SIDS Lighthouses Initiative (LHI), launched at the United Nations Climate Summit in 2014, aims to support SIDS in their energy transformation. As a framework for action, it addresses all elements of the energy transition, from policy and market frameworks to technology options and capacity building. The Initiative facilitates co-ordinated support for SIDS, primarily through partnerships with public, private, intergovernmental and non-governmental stakeholder organisations.
