On 18 November 2020, EASE General Assembly elected Mr David Post, Head of Energy Storage Solutions at Enel X, to serve as the new EASE President. Mr Post is an expert in business development for renewable, conventional energy and energy storage projects and previously occupied the position of EASE Vice-President and served as head of the association's Technology and Value Assessment Committee.

The EASE Secretariat prepared an analysis the revision of the Renewable Energy Directive (RED III and RED III.5), which entered into force on 20 November 2023

EASE has prepared an analysis of the published Strategic Technologies for Europe Platform (STEP) and its potential impact on the energy storage industry.

EASE analyzes the Net-Zero Industry Act (NZIA), focusing on measures to foster cleantech manufacturing in Europe.

EASE has published an analysis on the Spanish state aid scheme which aims to support the development of innovative electricity storage projects.

Avenue Adolphe Lacombl? 59/81030 Brussels

BRUSSELS (Belgium), Tuesday 11th June 2024: In 2023, the equivalent of 1.7 million more European homes became solar battery powered. According to the latest analysis from SolarPower Europe, 17.2 GWh of new BESS capacity was installed in Europe in 2023, experiencing an impressive 94% increase compared to 2022.

Walburga Hemetsberger, CEO of SolarPower Europe, said, "Growing battery storage and flexibility represents a fundamental shift from our current grid-centric view of the market. It impacts not only the way we plan infrastructure and the way we operate the system, but also the markets we engage with.

The new Electricity Market Design (EMD) legislation lays the groundwork for a more robust energy policy. We need to urgently implement these measures and call on the European Commission to report on the EMD implementation ahead of the first Energy Council in 2025."
