How to publish in this journal

The SJR is a size-independent prestige indicator that ranks journals by their "average prestige per article". It is based on the idea that "all citations are not created equal". SJR is a measure of scientific influence of journals that accounts for both the number of citations received by a journal and the importance or prestige of the journals where such citations come from It measures the scientific influence of the average article in a journal, it expresses how central to the global scientific discussion an average article of the journal is.

Evolution of the number of published documents. All types of documents are considered, including citable and non citable documents.
