

Energy storage regulations kyrgyzstan

The National Energy Program and the Strategy for Fuel and Energy Sector Development (covering 2010-25) are the key policies for sustainable energy development. The rapid expansion of renewables, especially hydro, is a priority for energy sector development, and the Strategy supports the construction of approximately 100 small hydroelectric ...

1. Kyrgyzstan's 2018-2040 National Development Strategy outlines plans to increase renewable energy production, excluding large-scale hydropower, to constitute 10% of the total energy supply by 2040. 2. Subsidized energy tariffs, however, act as a barrier to investments in renewable energy as well as transmission and distribution

The Law defines the overall legal framework including definition of legal responsibilities and the instruments to foster energy efficiency in the Republic of Kyrgyzstan. The Law was adopted to promote energy efficiency in generation, transmission and consumption of energy.

Having set a goal to reduce greenhouse gas emissions by 44% by 2030 and to achieve carbon neutrality by 2050, the Kyrgyz Republic recognises that renewables - primarily hydropower - will be the driver of zero-carbon policies, given their enormous potential in the country.

Permitting requirements and procedures should be streamlined under an overarching renewable energy law, implemented through concrete secondary regulations, which clearly articulate the process and identify
